Autlán makes minority investment in gold and barite

October 6, 2015

Compañía Minera Autlán, S.A.B. de C.V. (Autlán) informs the investing public that, as part of its strategic diversification plans in its Mining Division, Autlán has acquired a minority stake in a gold mine located in the state of Sonora. Likewise, it made a minority investment in barite deposits, a mineral used in the oil industry. These investments allow us to further diversify our mining activities. The mines were acquired in alliance with other companies and where Autlán's experience in the extractive sector will be relevant to improve the operations of the aforementioned investments. This is the first step with which we venture into precious metals and other industrial minerals with which we reiterate our investment strategy to grow in our three Divisions: Mining, Energy and Ferroalloys.

Autlán is a Mexican company with worldwide recognition for the quality and specialization of its products, which provides the steel industry with dry batteries, ceramics, micronutrients and / or fertilizers. The backward integration of key inputs, our operational strength, a growing market, proven reserves for the next 40 years and qualified and committed personnel support the strength of the company.
