

2Q17 Results Guide

June 19, 2017

Compañía Minera Autlán, S.A.B. de C.V. (Autlán) presents its results guide for the second quarter of 2017.

In addition to the continuous cost reduction plan, operational improvements and high return organic investments in all our production units, the recovery in the international prices of the ore and manganese ferroalloys shown since the fourth quarter of 2016, have allowed an improvement of our financial results so far this year.

For the second quarter of 2017, we estimate that Autlán's net sales reach at least an increase of 30% compared to the second quarter of 2016. In turn, the generation of EBITDA is forecast to be 2.8 times higher than that obtained in the same period of the previous year.

With these results, EBITDA is expected to remain at attractive levels during the current year, since only the one corresponding to the first six months of 2017 will exceed at least 25% of the total figure reported during 2016.

Autlán is a Mexican company with worldwide recognition for the quality and specialization of its products, strategic supplier of minerals and manganese ferroalloys. We generate value for our shareholders, staff and clients using the experience, the best available technology and future development projects as part of the values and growth of the company.
