

Release

Final resolution anti-dumping investigation against the Republic of Korea

December 15, 2016

Compañía Minera Autlán, S.A.B. de C.V. (Autlán) reports that today the Ministry of Economy published in the Official Journal of the Federation the final resolution of the anti-dumping investigation on imports of high carbon ferromanganese (HC FeMn) originating in the Republic of Korea, determining a countervailing duty final 35.64% to all imports of HC FeMn of Korean origin regardless of the country of origin.

This decision ends the anti-dumping investigation initiated on January 8, 2016 in response to the request filed by Autlán on November 20, 2015. The Ministry of Economy determined that imports of HC FeMn originating in the Republic of Korea were carried out under conditions of price discrimination and caused material injury to the domestic industry.

Autlán is a Mexican company with worldwide recognition for the quality and specialization of its products, which provides the steel industry with dry batteries, ceramics, micronutrients and / or fertilizers. The backward integration of key inputs, our operational strength, a growing market, proven reserves for the next 40 years and qualified and committed personnel support the strength of the company.
