

## **Autlán signs agreement for wind project development and construction**

July 26, 2017

---

Compañía Minera Autlán, S.A.B. de C.V. (Autlán) announces that it has agreed to the development of a wind project in the north of the country in pursuit of its investment strategy and growth of its Energy Division, which already has experience in hydroelectric power generation and with this project, reinforces its main interest in generating clean energy.

Through its subsidiary GFM Energía, S.A. of C.V. (GFME), Autlán reached an agreement with BAS Projects Corporation S.L. (BAS), based in Spain, for the development, construction and commissioning of the 50 MW wind project in the state of Coahuila. In terms of the agreement, BAS and GFME are associated in participation in the specific purpose vehicle Energía y Proyecto Eólicos, S.A.P.I. of C.V. so that, in society, the construction and start-up of this wind farm begins. Within the agreed terms, it is contemplated that Dominion, a company affiliated to BAS, is responsible for the project until the commercial operation.

Energía y Proyectos Eólicos, S.A.P.I. de C.V. has a legacy power generation permit in the 50MW self-consumption mode. The company also has a signed interconnection contract, as well as the authorization on the Environmental Impact Manifesto issued by SEMARNAT. It is estimated that the project can begin construction during the second quarter of 2018.

*Autlán is a Mexican company with worldwide recognition for the quality and specialization of its products, strategic supplier of minerals and manganese ferroalloys. We generate value for our shareholders, staff and clients using the experience, the best available technology and future development projects as part of the values and growth of the company.*
